SAFETY FIRST CAMPAIGN IS VERY FAITHFUL

On the Part of the Railroad Company as Shown by Annual Review.

BALTIMORE, Feb. 2.—That the management and employees of the Baltimore and Ohio railroad pursued the safety first campaign with unflagging interest during the last year is indicated by the annual review of the work by the chairman of the central safety committee showing the measures taken to remove the danger to the men and protect the lives and property of patrons.

During the year the employees while holding 204 safety committee meetings had 17,066 recommendations, in the interest of safety with the result that 16,411 or ninety-six per cent, were disposed of. This was an increase of forty-six recommendations the company's physician eighteen per cent in the corrections made, as compared with last year.

To the general use of goggles by mechanics the company's physician attributes a prevention of fifteen injuries to employees' eyes on one division while on another division there were ten instances of the protection provided by the railroad having saved the sight.

The rigid inspection of equipment, terminal property and other facilities of the safety department believe to have been responsible for a decrease in the number of accidents. This decrease is regarded as remarkable because the force was augmented to handle increased business, and in increasing the force inexperienced men are recruited.

The Ohio River division employees made the highest record for disposing of recommendations, there having been 865 suggestions made with but three remaining to be disposed of at the close of the year.

Of 4,559 suggestions made by employees of the Philadelphia division, only sixty-three remained to be disposed of. This record of ninety-eight per cent was equaled by the Baltimore, New York and the Chicago Terminal divisions.

FARMERS MEETING IS DUE FOR SATURDAY.

At the court house Saturday we will discuss "How and When to Sow Clover." Clover seed is very high and we cannot afford to take the risk of sowing it at the wrong time or in the wrong way. The kinds of machines needed on Harrison county farms will also be discussed. Thousands of dollars have been lost to the farmers of the county because they did not have proper machinery and many dollars have been paid out for farming implements that should have been put into better kinds. In the meeting Saturday we will try to make plain the need of more and better machines.

W. D. ZINN, county agent, United States Department of Agriculture.

BODY

Pedestrians at once picked him up and he was carried into the garage but he was dead. Physicians who were summoned said his death was due to heart failure.

GOOD WORK FOR SICK WOMEN

The Woman's Medicine Has Proved Its Worth.

When Lydia E. Pinkham's remedies were first introduced, their curative powers were doubted and had to be proved. But the proof came, and gradually the use of them spread over the whole country. Now that hundreds of thousands of women have experienced the most beneficial effects from the use of these medicines, their value has become generally recognized, and Lydia E. Pinkham's Vegetable Compound is the standard medicine for women.

The following letter is only one of the thousands on file in the Pinkham office, at Lynn, Mass., proving that Lydia E. Pinkham's Vegetable Compound is an article of great merit as shown by the results it produces.

Anamosa, Iowa.—"When I began taking Lydia E. Pinkham's Vegetable Compound I suffered with a displacement, and my system was in a general run-down condition. I would have the headache for a week and my back would ache so bad when I would bend down I could hardly straighten up. My sister was sick in bed for two months and doctored, but did not get any relief. She saw an advertisement of your medicine and tried it and got better. She told me what it had done for her, and when I had taken only two bottles of Lydia E. Pinkham's Vegetable Compound my head began to feel better. I continued its use and now I don't have any of those troubles."—Mrs. L. J. HANNAH, R.F.D. 1, Anamosa, Iowa.
